Volume 39 Author Index

Ausubel, J., 2, 11
Ayres, R.U., 7, 145

Bolger, F., 235
Bommer, M.R.W., 377
Bonanzinga, P., 363
Brooks, H., 4, 5, 103

Cabe, R., 265
Chiang, J.-T., 391
Coates, J.F., 327, 331, 411

De Greene, K.B., 349
De Wit, G.R., 201
Diederen, P.J.M., 9, 201
Dinar, A., 309

Ezekoye, I., 7, 145

Gordon, T.J., 337
Grübler, A., 1, 7, 159

Hjelm, J., 9, 221

Janaro, R.E., 377

Kamann, D.-J.F., 3, 45
Kelley, M.R., 4, 5, 103
Kemp, R.P.M., 201

Leporelli, C., 363
Levine, D., 253
Linstone, H.A., 319, 417
Luper, D.C., 377

Mahajan, V., 291
Marazita, C.F., 397
Marom, D., 309
Martino, J.P., 335
Modelski, G., 3, 23
Muller, E., 291
Muysken, J., 201

Nakićenović, N., 1, 8, 181
Nicolo, E., 363
Nijkamp, P., 3, 45

Peirce, W.S., 3, 35
Perry III, G., 3, 23

Rakel, H., 253
Renn, O., 253
Rosegger, G., 4, 81
Rowe, G., 235

Silverberg, G., 3, 4, 67

Tilton, J.E., 5, 127

Webler, T., 253
Wright, G., 235

Volume 39 Book Review Index

Ernste, H., and Jaeger, C., eds., *Information Society and Spatial Structure*, 327
Golden, W.T., ed., *Science and Technology Advice to the President, Congress, and Judiciary*, 331
Knezo, G.J., *White House Office of Science and Technology Policy: An Analysis*, 331
Miller Center of Public Affairs, *Report of the Miller Center Commission on the Presidency and Science Advising*, 331
National Academy of Sciences, *Science and Technology Advice in the White House: Recommendations for President-Elect George Bush*, 331
Reiss, M., *Without the Bomb*, 335
Thompson, K.W., ed., *The Presidency and Science Advising*, 331
Toffler, A., *Powershift*, 417

Volume 39 Subject Index

Adoption
of computers in agricultural extension, 309
of contingent product, 291
evolutionary process in, 67
of new telecommunication service, 363
of primary product, 291
by small firms, 103
After-tax pay
of corporate chief executive officers in USA, 321
Agricultural extension
rates and patterns of computer adoption and use in, 309
Appropriability
of technical change, 70
Appropriateness
in international technology transfer, 377
Area of specialization
adoption and use of computers in agricultural extension affected by, 309
Artificial intelligence systems
need for paradigm shift in, 349
Auto industry
interfirm cooperation in, 82
Automation
programmable, 103

Banking, in Holland
diffusion of process technology in, 201
Beverage container industry, in USA
material substitution in, 127
Bifurcations
in spatial dynamics, 45
Bounded rationality
circumvention of in technology programs, 391

Catch-up effect
in diffusion of pervasive systems, 181
Census Bureau, USA
gap between rich and poor estimated by, 321
Ceteris paribus qualification
for theoretical work, 265
Chain saw
in Swedish forestry, 221
Chaotic behavior
in spatial dynamics, 45
Chaotic series
forecasting of using regression, 337
Collective evolutionary process
adoption and diffusion of technology as, 67
Collective invention
as concept of innovation, 69
Collectivism, in USA
trends in, 323
Common Market of Six
jurisdictional integration in, 36
Competition
in diffusion, 145
in international technology transfer, 377
in research and development technology programs, 391
Complementarity
in diffusion, 145
Computer technologies
in agricultural extension, 309
need for paradigm shift in, 349
Concentration
of control, 322
Contingent products
pricing and diffusion of, 291
Control
concentration versus diffusion of, 322
Cost-sharing principles
in research and development technology programs, 391
Crazy companies
in diffusion of technologies and social behavior, 11

Delphi technique
group variation on, 253
reevaluation of, 235
Demand-pull hypothesis
in technogenesis, 46
Democracy
diffusion of, 1
long perspective on development of, 23
world increase in, 321
Depression-trigger hypothesis
in technogenesis, 46
Deterministic substitution model
in technological evolution, 146
Diffusion
competition in, 145
complementarity in, 145
of computers, 309
of control, 322
of innovation, 1
through interfirm cooperation, 81
long-term patterns and discontinuities in, 159
of new telecommunication service, 363
of pervasive systems, 181
of primary and contingent products, 291
of process innovations to small firms, 103
of process technology in Dutch banking, 201
in "Single Europe", 35
of social behavior, 11
of technologies, 11, 67, 265
in turbulent environment, 45
Discontinuities, long-term
of diffusion, 159
Discrete time model
for adoption of new telecommunication service, 363
Dominant design
of innovations, 70
Durable investment
under technological change, 69
Dynamic interpretive model
network constraints and service quality in, 363
Dynamics
rat-race, 11

Economic restructuring
in 1980s, 45
Electric power system
development of, 70
Energy resources
long-term prospects for, 321
Engineering research centers
industrial research at versus technological needs of U.S. industry, 397
Environmental conditions
of recipient country in international technology transfer, 377
Equilibrium diffusion of technological change through multiple processes, 265
Europe
innovation and diffusion in, 35
large technology-based systems in, 349
European Communities
institutional structure and industrial prospects for, 35
Evolutionary ergonomics
integrated design/operations concept illustrated by, 349
Expert systems
need for paradigm shift in, 349
Extension discipline
adoption and use of computers in agricultural extension affected by, 309
External learning opportunities
for small firms, 103

Fisher–Pry substitution model
of technological change, 23
Forecasting
of chaotic series using regression, 337
Forestry, in Sweden
chain saw in, 221
From my perspective [column], 319, 411
Full cost endorsement
for technology programs, 391

Gap between rich and poor
in USA, 321
Gompertz curve
in technological evolution, 145
Government funding strategy
in technology programs, 391
Greenhouse effect
challenge presented by, 321

Heterogenous agents
changing circumstances in environment of, 265
Holland
banking in, 201
Human capital variables
adoption and use of computers in agricultural extension affected by, 309

Incentive structures
heterogeneity of, 103
Individualism, in USA
trends in, 323
Industrial prospects
for European Communities, 35
Industrial rejuvenation
in 1980s, 45
Industry, in USA
technological needs of versus industrial research at engineering research centers, 397
Information resources
long-term prospects for, 321
Information technology
in Dutch banking sector, 201
Innovation diffusion
as collective evolutionary process, 67
new perspectives on, 1
in "Single Europe", 35
to small firms, 103
Institutional structure
for European Communities, 35
Integrated firms
pricing and diffusion of primary and contingent products by, 291
Interfirm cooperation
diffusion through, 81
International competition
attenuation of, 37
International debt
development of, 319
International technology transfer
manufacturing strategy model for, 377
Israel
computer technology adoption by agricultural extension in, 309

Japan
large technology-based systems in, 349
plants built by in European Communities, 35
VLSI project in, 391
Joint projects
between multinational enterprises, 82
Jurisdictional integration
in European Communities, 35

Know-how trading
in utilization of new technology, 104
Kondratieff cycles
in technogenesis, 45

Large technology-based systems
and need for paradigm shift, 349
Learning
concept of, 70
Life-cycle model
of technological evolution, 145
Light bulb
development of, 70
Likert scaling
in group Delphi technique, 253
Lock-in mechanism
in technological evolution, 146
Long waves
in technogenesis, 45

Managerial implications
of pricing and diffusion of primary and contingent products, 291

Manufacturing strategy model
for international technology transfer, 377
Materials resources
long-term prospects for, 321
Material substitution
role of new technology in, 127
Megalopolis, global
tensions and violence in, 320
Military buildup
as factor in international debt, 319
Multinational enterprises
cooperative agreements among, 81
Multiple process models
for equilibrium diffusion of technological change, 265

National Science Foundation
engineering research center program of, 397
Network constraints
in dynamic interpretive model, 363

Octane, case of
in competition and complementarity in diffusion, 145
Ontogenic model
of technological evolution, 145
Open questions
in group Delphi technique, 253
Origins
in turbulent environment, 45

Paradigm shift
need for in large technology-based systems, 349
Patterns, long-term
of diffusion, 159
Person–machine systems, tightly coupled
need for paradigm shift in, 349
Pervasive systems
diffusion of, 181
Pollution
challenge presented by, 321
Population explosion
global, 320
Power
diffusion of, 322
Pricing
of primary and contingent products, 291
Primary products
pricing and diffusion of, 291
Private sector
research and development in, 391
Process gain
removal of opportunity for, 235
Process innovations
diffusion of to small firms, 103
Process loss
of interacting groups, 235
Process technology
diffusion of in Dutch banking, 201
Producer–user interactions
in development and adaptation process, 69
Product mix, total
maximizing profits of, 291
Public policy implications
of pricing and diffusion of primary and contingent products, 291

Rat-race dynamics
in diffusion of technologies and social behavior, 11
Reapers
diffusion of, 68
Recipient country
resource infrastructure of, 377
Recursive equation, nonlinear
chaotic sequence produced by, 337
Regression
forcasting a chaotic series using, 337
Research and development
collective evolutionary process in, 69
government funding strategy in, 391

Schumpeterian viewpoint
on endogeneity of Kondratieff cycles, 45
Service quality
in dynamic interpretive model, 363
Sewage sludge, application of to farmland
risk assessment of, 253
Small firms
diffusion of process innovations to, 103
Social behavior
diffusion of, 11
Sociotechnical systems
need for paradigm shift in, 349
Spatial development
in technogenesis, 45
Strategic partnering
between multinational enterprises, 82
Supply side of economy
in technogenesis, 45
Sweden
forestry in, 221
Systems theory, recent developments in
need for paradigm shift suggested by, 349

Technogenesis
in turbulent environment, 45
Technological change
durable investment under, 69
equilibrium diffusion of, 265
Technological expectations
role of, 69
Technological innovation
in 1980s, 45
Technologies
adoption of, 67
diffusion of, 11, 67
interfirm cooperation in development of, 81
in material substitution, 127
in reshaping of world, 320
Technology programs
government funding strategy in, 391
Technology transfer
manufacturing strategy model for, 377
in USA, 397
Telecommunication service, new
diffusion of, 363

Transfer mechanisms
in technogenesis, 46
Transport infrastructures
in diffusion of pervasive systems, 181
Turbulent environment
origins and diffusion in, 45
Two-parameter model
fitting of to chaotic equations, 337

Uncertainty
reduction of, 253
Underwriting
of research and development technology programs, 391
United States
future of, 319
large technology-based systems in, 349
plants built by in European Communities, 35
technology transfer in, 397
Universities
engineering research centers in, 397
Urban incubation
in 1980s, 45
User–producer interactions
in development and adaptation process, 69
USSR
economic collapse potential in, 319
innovation and productivity in, 36

VLSI Project
strategy of, 391
Voodoo economics
development of, 323

Wars, entered by USA
itemization of, 320
